

REMARKS

Applicants thank the Patent Office for the careful attention accorded this Application and respectfully requests reconsideration in view of the Amendment above and remarks set forth below.

In response to the Office Action mailed July 7, 2005, Applicants have elected Species III, comprised of Claims 59-60, and have canceled claims 27-58 without prejudice or disclaimer, and amended Claim 60. Applicants reserve the right to file one or more continuation applications based on the canceled claims.

The present invention defined by Claims 59 and 60 is directed to a method of developing an application program for running on a wireless portable data terminal (PDT), comprising the steps of (a) during the development of an application program for running on a wireless PDT supported by a first operating system, generating user input and documents using development programs running on a developer computer system supported by a second operating system; (b) developing the application program on the developer computer system into a final application program expressed in the form of binary executable code designed for execution on the first operating system loaded onto the wireless PDT; (c) downloading the binary executable code of the final application program onto the wireless PDT; and (d) running the final application program in binary executable code upon the first operating system loaded onto the wireless PDT.

Notably, this combination of inventive features is neither disclosed, taught or suggested by the prior art, singularly or when taken together.

In view therefore, of the Amendment set forth above, the present invention as defined by Claims 59-60 is firmly believed to be in condition for allowance.

Favorable action is earnestly solicited.

Respectfully submitted,

Dated: October 7, 2005

Thomas J. Perkowski, Esq.
